Disclaimer
The statements, opinions and data contained in this publication are solely those of the individual authors and contributors and not of the publisher and the editor(s). The appearance of advertisements in the journal is not a warranty, endorsement, or approval of the products or services advertised or of their effectiveness, quality or safety. The publisher and the editor(s) disclaim responsibility for any injury to persons or property resulting from any ideas, methods, instructions or products referred to in the content or advertisements.

Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.

The present supplement has been issued with the support of the Coca-Cola Co.

The Coca-Cola Company
Hydrating the World since 1886
Dear Participants,

The 20th International Congress of Nutrition (ICN) is organized under the auspices of the International Union of Nutritional Sciences (IUNS) by the Spanish Society of Nutrition (SEÑ). To organize the IUNS 20th ICN at these times of economic and financial crisis has been a big challenge. Notwithstanding, at the same time it offered us the unique opportunity to bridge the multidisciplinary areas of nutritional sciences, particularly basic and applied research activities all around the world. Furthermore, this Congress provided a broad platform to discuss experiences gathered at multinational and global levels in the fields of nutrition research, human nutritional requirements, role of nutrition in the promotion and prevention of chronic non-communicable diseases and nutrition education, as well as in the composition of foods and the role of bioactive food components on health and well-being at different food cultures. Likewise, food safety and consumer protection and food production and environment sustainability are major aspects related to food science and nutrition worldwide that are approached. Therefore, we planned a comprehensive congress under the theme "Joining Cultures through Nutrition" to convey nutrition and healthy lifestyles for everyone in a sustainable environment.

Being conscious of the broad range of professionals working in the different fields of nutritional sciences, the 20th ICN features a 'Track' design of audience segmentation by grouping the related sub-themes and ensuring the inclusion of sessions from scientific knowledge to applications. The main tracks are:
1: Advances in Nutrition Research
2: Nutrition Through Life Course
3: Public Health Nutrition and Environment
4: Nutrition and Management of Diseases
5: Nutrients and Nutritional Assessment
6: Functional Foods and Bioactive Compounds
7: Food culture practices and Nutritional Education
8: Agriculture, Food Science and Safety

The scientific program comprises 6 plenary lectures, 32 special lectures, 4 debates, 90 parallel symposia, 38 sponsored symposia and 16 Satellite Symposia.

The response to the proposed scientific program was very encouraging. In addition to the invited lectures, we received about 3570 submissions, 96% of which have been accepted. 347 correspond to invited speeches for Paralleled Symposia (30% did not deliver any abstracts), 193 have been selected to be presented as Oral communications and 3223 as e-posters. All submitted abstracts were peer-reviewed by at least two independent reviewers blinded to authors and institutions from the International and Local Scientific Committees. The number of entries in the list of abstract is higher than 17000. An effort has made to assure the involvement of speakers and participant from all continents and countries, including nutrition and food specialists in research, academia and industry as well as policy makers with a gender balance and applicability for all societies.

In the present Supplement of Annals of Nutrition and Metabolism only the abstracts for Parallel Symposia, Oral Communications and Posters are published. In addition, the abstracts corresponding to the International NUTRIMENTHE Conference, which has been held as a Satellite event of the 20th ICN, are also published. The Plenary Lectures and Special Lectures will be published later on in full in a Supplement of Advances in Nutrition available on-line to all 20th ICN participants.
The 20th ICN wish to recognize and thank the importance of the participation of young investigators and nutrition professionals from developing countries. Travel grants, registration fee and accommodation for selected young investigators and other awardees were made possible by contribution from international agencies and foundations and private sectors. A special fee rate for students and participants from low- and middle income countries was offered to encourage their participation.

We would like to express our sincere appreciation to all participants and particularly to invited speakers and national and international experts and delegates whose contributions, participation and interest make this congress a successful forum for sharing and exchanging knowledge in nutritional sciences for the benefit of the whole world.

Prof. Angel Gil  
Congress President and Chairman of the Organizing Committee

Prof. J. Alfredo Martinez  
President of the Scientific Committee

DISCLAIMER

All abstracts have been printed as received and formatted for uniformity and the Organizing and Scientific committees cannot be claimed responsible of the contents and future applications. All views expressed during the scientific sessions at this Congress are those of the individual authors and do not necessarily reflect the views of any of the Committees or any other individual member of these Committees or the views of any of the official organizing bodies.
## Paralleled Symposia

### T1 ADVANCES IN NUTRITION RESEARCH

### T2 NUTRITION THROUGH LIFE COURSE

| NPS1-2 Efficacy of lipid-based nutrient supplements for prevention of maternal and infant undernutrition in Africa: Results of the iLiNS Project | 23-26 |
| PS1-2 Nutrition and lifestyle in adolescents: The HELENA study | 26 |
| PS2-10 Energy balance and active living | 26-28 |
| PS2-18 Healthy life style promotion | 28-29 |
| PS3-26 Scaling up nutrition to improve infant and young child feeding (IYCF) (Alive & Thrive) | 29-30 |
| PS3-34A Nutrients and exercise performance – What is the evidence behind recent claims of major benefits? | 30-32 |
| PS3-34B Past and current experiences in leveraging multiple program and partner platforms to scale-up nutrition interventions (The SPRING project) | 32-34 |
| PS4-42A Complimentary feeding and infant health (FAO) | 34-36 |
| PS4-42B Generating evidence of impact for integrated programs aimed to improve child nutrition during the first 1000 days (IFPRI) | 36-38 |
| PS4-50 Early diet is critical for later development - New research into changing early eating habits (HABEAT and VIVA) | 38-40 |
| PS5-58 NUANCE research | 41-43 |
| PS5-66A Trace elements and chronic diseases | 43-44 |

### T3 PUBLIC HEALTH NUTRITION AND ENVIRONMENT

| NPS1-3 Nutrition and enviromental sustainability (FAO) | 45-46 |
| PS2-11 Global challenges in maternal and child nutrition for today and the future | 46-47 |
| PS2-19 Confronting the global epidemic of noncommunicable diseases: Findings from the NHLBI/ UHG Global Network | 47-49 |
| PS3-27 Community-based programme to prevent obesity: Lessons and perspectives from 20 years of experience (EPODE International Network) | 49 |
| PS3-35 Promoting healthy growth and preventing childhood stunting – a WHO initiative | 50-51 |
| PS4-43 Nutrition Profiling (WHO) | 51 |
| PS4-51 Nutrition, physical activity and the prevalence of NCDs in the Middle-East and North-Africa | 51-53 |
| PS5-59 Food insecurity and obesity across the life cycle | 54-55 |
| PS5-67 Type 2 diabetes in Asia’s rapid growth is due to genetic or dietary change? | 55-58 |

### T4 NUTRITION AND MANAGEMENT OF DISEASES

| NPS1-4 Dietary lipids and the risk of common diseases | 59-60 |
| PS1-4 Scaling up prevention and treatment of malnutrition | 60-62 |
| PS2-12 Food, nutrition, physical activity and cancer – Keeping the evidence current: WCRF/AICR Continuous Update Project (CUP) | 62-64 |
| PS2-20 Tackling obesity in pre-school children: First results from the ToyBox-Study | 64-66 |
T7 FOOD CULTURE AND NUTRITIONAL EDUCATION
PS3-28 Role of dietary macronutrients on weight management. Role of protein and glycemic index in body weight regulation – Lessons from the Diogenes intervention study ........66-68
PS3-36 ISCOLE: International Study of Childhood Obesity, Lifestyle and the Environment........68-70
PS4-44 Nutrition in inflammatory bowel diseases. From basic to clinical application ........70
PS4-52 International Life Sciences Institute (ILSI) Session on Food Allergy ..................................70
PS5-60 Maternal nutritional supplementation of HIV-infected women during lactation:
Implications for maternal and infant health in resource poor settings ..............................71-72
PS5-68 New insights in obesity, metabolic syndrome and diabetes ..................................72-73

T5 NUTRIENTS AND NUTRITIONAL ASSESSMENT
NPS1-5 Methods and outcomes of nutritional assessment and health monitoring ............75-78
PS1-5 The SMILING Project: A South East Asian- European collaborative action to prevent micronutrient deficiencies in women and young children in South-East Asia ..........78-81
PS2-13 Harmonization of human zinc requirements and country experiences in assessing population zinc status .................................................................81-82
PS2-21 Assessment of body composition from birth to 2 years ..........................................82-84
PS3-37 Findings from 5 birth cohorts from developing countries: The COHORTS collaboration ...84-86
PS4-45 Iron and Malaria (FeMal) Project Results .................................................................86-88
PS4-53 Strengthening micronutrient nutrition surveillance: WHO and CDC tools and methods ...88-89
PS5-61 Micronutrient Fortification. Science and Strategies for Public Health
Improvement in Asia ........................................................................................................90-93
PS5-69 Evaluation of food fortification and biofortification interventions in developing countries using stable isotopes .................................................................93-94

T6 FUNCTIONAL FOODS AND BIOACTIVE COMPOUNDS
NPS1-6 PREVIEW Project ........................................................................................................95-98
PS1-6 Diversity of physiological functions of amino acids and peptides ..........................98-99
PS2-14 Dietary reference values for DNA damage prevention ........................................99-101
PS2-22 The role of nutrition in healthy ageing: Insight from the CHANCES Project ..........101-102
PS3-30 Fibres and the gut immune system(FIBEBIOTICS Project) ......................................102-103
PS3-38 HEALTHGRAIN Forum Symposium - Cereal foods and health - New results and science based nutrition guidelines .................................................................103-106
PS4-46 Functional roles of human milk and other selected oligosaccharides .....................106-107
PS4-54 Functional roles of prebiotic inulin-type fructans ..................................................108-109
PS5-70 Phytochemicals responsible for the food function, from the chemistry to physiological relevance and human health .................................................................110-111

T7 FOOD CULTURE AND NUTRITIONAL EDUCATION
NPS1-7 The role of nutraceuticals in health along with basic nutrition ..............................113-114
PS1-7 Cultural differences in diet and nutrition across Europe. Impact on health ................114-116
PS1-7 B Professionalism and Capacity Building in Nutrition – a UK perspective ............116
PS2-15 Linking food security and nutrition education to improve infant and young child feeding ........................................................................................................116-118
PS2-23A China’s nutrition transition: Implications of rapid social and economic change for non-communicable disease risk .................................................118-121
PS2-23B A global partnership to improve nutrition medicine in Vietnam ..........................121-122
PS3-31A Building research capacity in Latin America to address NCDs and obesity .......122-123
PS3-31B Traditional, Indigenous and cultural food and nutrition .......................................123-125
PS3-39A ENLP -Nutrition during times of economic crisis, let’s cook something up! ......126-127
PS3-39B Capacity development in innovative techniques in food and nutrition research ......127-128
PS4-47 Mediterranean diet and disease .............................................................................128-129
PS4-55 PREDIMED study ...............................................................................................129-130
PS5-63A Regulation Versus Innovation (IUFoST) ...............................................................130-132
PS5-63B Food systems for nutrition and health: Growing, shopping, cooking and eating ....132-134
PS5-71A The value of nutrition labelling: Has nutrition labelling reduced any chronic diseases? (IUFoST) ..............................................................134-135
PS5-71B Urbanization and Food Security ........................................................................135-137
T8 AGRICULTURE, FOOD SCIENCE AND SAFETY

NPS1-8 IMAPP (Intake, Monitoring and Program Planning): Software nutrient intake data........................................ 139-141
PS1-8 Food-based approaches to improve multiple micro-nutrient deficiencies and protein quality................................................................. 141-144
PS2-16 Food composition (FAO) .................................................................................................................................................. 144-146
PS2-24 Sugars and health: The controversies continue ............................................................................................. 146-147
PS3-32 Low-calorie sweeteners: Are they safe and can they help with weight management?.... 147-148
PS3-40 FESNAD forum ......................................................................................................................................................... 148-151
PS4-48 Bellagio report on healthy agriculture, healthy nutrition, healthy people................. 151-153
PS4-56 Food and nutrition reporting in the media ........................................................................................................ 153-154
PS5-64 Feeding workers ......................................................................................................................................................... 154-155
PS5-72 The shift toward a modern industrialized food system, potential implications for nutritionrelated chronic diseases and for public policies........................................................................ 155-156

Oral Communications
O001 TUMOR SUPPRESSOR GLYCINE-N METHYLTRANSFERASE REGULATES ONE CARBON TRANSMETHYLATION KINETICS .................................................................................................................. 157

O097 DIETARY CAROTENOIDS AND BREAST CANCER RISK AMONG CHINESE WOMEN .. 205
O098 ZINC ABSORPTION FROM RICE IS SIMILAR WHEN ZINC IS INTRINSICALLY INCREASED THROUGH BIOFORTIFICATION OR EXTRINSICALLY ADDED AS ZN(SO)4................................................................. 206
O099 SEX DIFFERENCES OF VITAMIN E METABOLISM IN RATS ........................................................................................................ 206
O100 IODINE EXCRETION HAS DECREASED IN DENMARK DURING THE LAST 5-6 YEARS ............................................................................................................................................................ 207
O101 EVALUATION OF ZINC STATUS AND COMMUNITY PERCEPTIONS IN PAKISTAN: THE NATIONAL NUTRITION SURVEY 2011 ........................................................................................................ 208
O102 DEFINING OBESITY USING BIOLOGICAL END POINT IN CHILDREN ................. 208
O103 RIBOFLAVIN STATUS IS INVERSELY ASSOCIATED WITH HOMOCYSTEINE AND DETERMINES THE EFFECT OF THE MTHFR 677C>T POLYMORPHISM ON HOMOCYSTEINE DURING PREGNANCY ........................................................................................................ 208
O104 AN INADEQUATE FRUIT AND VEGETABLE INTAKE HAS ONLY A SMALL EFFECT ON VITAMIN STATUS IN EUROPEAN ADOLESCENTS- THE HELENA STUDY ...... 209
O105 CLASSIFICATION OF BODY MASS INDEX OF RURAL AND PERI-URBAN SCHOOL CHILDREN AND ADOLESCENTS IN NIGERIA USING TWO INTERNATIONAL STANDARDS ........................................................................................................ 210
O106 FRUIT MACROANTIOXIDANTS, A NEW TYPE OF MAJOR PLANT FOOD CONSTITUENTS, SIGNIFICANTLY CONTRIBUTE TO THE INTAKE OF ANTIOXIDANTS IN THE DIET ........................................................................................................ 210
O107 EFFECT OF A DIETARY SUPPLEMENT IN BODY COMPOSITION IN PERIMENOPAUSAL WOMEN ............................................................................................................................................................ 211
O108 EFFECTS OF SEAWEED-RESTRUCTURED PORK DIETS ENRICHED WITH CHOLESTEROL ON RAT LIVER HISTOLOGICAL PARAMETERS ........................................................................................................ 211
O109 PRECLINICAL EVALUATION OF THE IMMUNOMODULATORY EFFECT OF LACTOBACILLUS PLANTARUM 3547 ON HUMAN MACROPHAGES AND OBESE WISTAR RATS ........................................................................................................ 212
O110 LACTOBACILLUS REUTERI DSM 17938 AND LACTOBACILLUS CASEICRL 431 MODESTLY INCREASE GROWTH, NOT IRON AND ZINC STATUS, AMONG INDONESIAN CHILDREN ........................................................................................................ 212
O111 CONSUMPTION OF A POLYPHENOL-RICH ORANGE JUICE IMPROVES ENDOTHELIAL BIOMARKERS IN OVERWEIGHT AND OBESE ADULTS(BIONAOS STUDY) ........................................................................................................ 213
O112 TEMPE AND TOFU FLOUR MAY HAVE POSITIVE EFFECT ON COGNITIVE FUNCTION ............................................................................................................................................................ 213
O113 EFFECT OF ADMINISTRATION OF CARNITINE ON THE CARDIAC AND
O165 DESIGN, ASSESSMENT OF REPRODUCIBILITY AND VALIDITY OF A FOOD FREQUENCY QUESTIONNAIRE IN A SAMPLE OF ADULTS LIVING IN QUITO-ECUADOR (QFA-QUITO) ........................................................................................................ 240

O166 RELATIONSHIP BETWEEN MAGNESIUM INTAKE, C-REACTIVE PROTEIN LEVELS AND THE METABOLIC SYNDROME COMPONENTS IN A HEALTHY ADULT POPULATION FROM MADRID ........................................................................................................ 241

O167 DETERMINANTS OF VITAMIN D STATUS IN PATIENTS WITH STABLE ANGINA IN THE NORTHERN REGION OF GHANA ........................................................................................................ 242

O168 TOWARDS A COMPREHENSIVE WEB-BASED DIETARY RESEARCH INFRASTRUCTURE TO SUPPORT INTERNATIONAL MONITORING AND EPIDEMIOLOGICAL NUTRITIONAL STUDIES ........................................................................................................ 242

O169 INHIBITORY EFFECTS OF LYCOPENE ON THE PROLIFERATION AND PROGRESSION OF HUMAN COLON CANCER CELLS IN BOTH IN VITRO AND IN VIVO MODELS ........................................................................................................ 243

O170 ANTI-INFLAMMATORY AND ANTIOXIDANT PROPERTIES OF FLAVONOID-RICH EXTRACTS FROM HELICHRYSUM AND GRAPEFRUIT IN INSULIN RESISTANT RATS ........................................................................................................ 244

O171 ORAL INTAKE OF A SPECIFIC OREGANO EXTRACT BY HEALTHY HUMANS INCREASES CALMNESS, VIGILANCE AND MENTAL PROCESSING SPEED ........................................................................................................ 244

O172 IMPROVEMENT EFFECTS OF CHLOROGENIC ACID ON LATE DIABETES THROUGH ADIPONECTIN RECEPTOR SIGNALING PATHWAYS IN DB/DB MICE ........................................................................................................ 245

O173 YOUNG ZEA MAYSPOWDER IMPROVES SOME NUTRIENT COMPOSITION AND REDUCES GLYCEMIC INDEX OF BUTTER BISCUIT ........................................................................................................ 245

O174 COMPARISON OF THE EFFECT OF DARK AND WHITE CHOCOLATE ON APO B, APOA-1, LIPID PROFILE, HS-CRP, GLYCEMIC CONTROL AND BLOOD PRESSURE IN HYPERTENSIVE TYPE 2 DIABETICS ........................................................................................................ 246

O175 ADOLESCENT DIETARY PATTERNS: TRADITION OR CONVENIENCE ........................................................................................................ 247

O176 IMPROVING WOMEN AND CHILDREN NUTRITION THROUGH TARGETED CAPACITY BUILDING INTERVENTIONS: EXPERIENCE FROM ETHIOPIA ........................................................................................................ 247

O177 CONDITIONS OF NUTRITION OF CHILDREN FROM 7 TO 10 YEARS IN PUBLIC SCHOOLS AT REGION MARUÍPE, VITORIA/ES - BRAZIL ........................................................................................................ 248

O178 TRENDS IN FOOD CONSUMPTION OVER 25 YEARS IN A DUTCH ADULT POPULATION ........................................................................................................ 248

O179 SOCIO-DEMOGRAPHIC PATTERNS OF HYPERTENSION, KNOWLEDGE, BEHAVIOURS AND PRACTICES OF ADULT TRIBAL (ADIVASI) POPULATION IN INDIA: A FIRST NATIONAL MONITORING SURVEY ........................................................................................................ 249

O180 THE EFFECT OF AFRICAN LEAFY VEGETABLES ON THE MICRONUTRIENT STATUS OF SCHOOL CHILDREN IN SOUTH AFRICA: A RANDOMIZED CONTROLLED TRIAL ........................................................................................................ 249

O181 DEVELOPING HEALTHY INDIGENOUS MENUS THROUGH WOMEN’S GROUP PARTICIPATION ........................................................................................................ 250

O182 PURCHASES OF ULTRA-PROCESSED PRODUCTS BY COLOMBIAN HOUSEHOLDS AND THEIR ASSOCIATION WITH DIETARY QUALITY ........................................................................................................ 250

O183 THE INFORMAS FRAMEWORK FOR MONITORING AND BENCHMARKING DIET QUALITY GLOBALLY: A STEP-BASED APPROACH ........................................................................................................ 251

O184 MONITORING THE NUTRITIONAL COMPOSITION OF FOODS TO IMPROVE THE GLOBAL FOOD SUPPLY ........................................................................................................ 251

XIV
O188 HIGH BIOAVAILABILITY IRON MAIZE (Zea mays L.) DEVELOPED THROUGH MOLECULAR BREEDING PROVIDES MORE ABSORBABLE IRON IN-VITRO (Caco-2) AND IN-VIVO (Gallus gallus) ................................................................. 252
O189 ASSOCIATION BETWEEN DIETARY INTAKES OF POLYCHLORINATED BIPHENYLS (PCBS) AND RISK OF OBESITY .......................................................... 252
O190 COMPARISON OF EFFECT OF CASH TRANSFER WITH OR WITHOUT SPECIAL NUTRITIOUS FOOD ON PREVENTING CHILDHOOD ACUTE MALNUTRITION IN NIGER ........................................................................... 253
O191 POTENTIAL OF WILD EDIBLE PLANTS TO COMBAT NUTRITIONAL AND FOOD INSECURITY: A CASE FROM INDIAN HIMALAYAN REGION .............................. 253
O192 EFFECTIVE COMMUNICATION CHANNELS FOR COMMUNITY MOBILIZATION DURING VITAMIN A SUPPLEMENTATION CAMPAIGNS IN 3 STATES OF NIGERIA .................. 254
O193 PHYTOCHEMICAL COMPOSITION OF PROCESSED AND RAW SAMPLES OF SOME LESSER KNOWN VEGETABLES FROM EASTERN ZONE NIGERIA .......................... 254
O194 TOWARDS NUTRITION GUIDELINES FOR MATERNAL AND INFANT NUTRITION TO INFLUENCE LONG-TERM HEALTH OF THE OFFSPRING: THE PAST AND FUTURE OF ILSI EUROPE WORK ON METABOLIC IMPRINTING....................... 255

Abstracts NUTRIMENTHE
01 CHILDHOOD DIETARY PATTERNS AND COGNITIVE FUNCTION ............................ 1859
02 PEDIATRIC OBESITY, A RISK FACTOR FOR IRON DEFICIENCY AND ITS COGNITIVE COMPLICATIONS: A NEED FOR DEVELOPMENT OF INTEGRAL NUTRITION PROGRAMS ......................................................................................................................... 1859
03 UNDER-NUTRITION LOWERS LEARNING AND MEMORY ABILITY AMONG CHILDREN AGE 5-6 YEARS OLD IN BOGOR – INDONESIA ................................... 1860
04 HABITUAL MISSING OF DINNER WAS ASSOCIATED WITH POOR NUTRITIONAL STATUS IN POOR URBAN PRESCHOOL CHILDREN, LAGOS, NIGERIA ............ 1860
05 THE RELATION BETWEEN DIET AND ALLERGEN CONCENTRATIONS IN BREAST MILK; OVALBUMIN CONCENTRATIONS AND LACTOFERRIN LEVELS IN BREAST MILK ............................................................... 1861
06 ONTOGENY OF HYPOTHALAMIC EXPRESSION OF OBESITY RISK GENES REVEALS TIME SPECIFIC WINDOWS FOR FTO, MC4R AND GNPD A2 .............. 1861
07 ASSOCIATION BETWEEN DIET AND MENTAL PERFORMANCE OF CHILDREN: VIEWS OF PARENTS AND TEACHERS IN FOUR EUROPEAN COUNTRIES ........ 1862
08 FACTORS AFFECTING FOOD CHOICES OF PARENTS OF CHILDREN AGED 4-10 YEARS IN FOUR EUROPEAN COUNTRIES ......................................................... 1862
09 ASSOCIATION BETWEEN DIET AND PHYSICAL AND MENTAL DEVELOPMENT OF CHILDREN: VIEWS OF PARENTS AND TEACHERS IN FOUR EUROPEAN COUNTRIES .................................................................................. 1863
10 MILD IODINE DEFICIENCY IN PREGNANCY IN EUROPE AND ITS CONSEQUENCES FOR COGNITIVE AND PSYCHOMOTOR DEVELOPMENT OF CHILDREN: A REVIEW ........................................................................ 1863
11 THE EFFECTS OF BREAKFAST ON IN-CLASS BEHAVIOUR IN CHILDREN AND ADOLESCENTS .................................................................................................................. 1864

XV
POLYUNSATURATED FATTY ACID LEVELS IN BLOOD DURING PREGNANCY, AT BIRTH AND AT 7 YEARS: THEIR ASSOCIATIONS WITH DIET AND TWO COMMON FADS2 POLYMORPHISMS

PREVALENCE OF DELAYED GROWTH IN SCHOOL CHILDREN BETWEEN 5 TO 10 YEARS OF AGE OF DISTRICT EDUCATIONAL INSTITUTION IN BOGOTÁ, COLOMBIA

DOES MATERNAL IODINE STATUS IN UK PREGNANT WOMEN INFLUENCE CHILD NEURODEVELOPMENT?

EFFECTS OF MATERNAL CG PRO12ALA PPAR PPARΓ2 POLYMORPHISM ON THEIR INFANTS NEURODEVELOPMENTAL SCORES AT 18 MONTHS OF AGE

IRON DEFICIENCY AND SCHOOLCHILDREN COGNITIVE PERFORMANCE IN MOROCCO

RECOMMENDATION PROVIDED BY HEALTH PROFESSIONAL TO PERSON WITH TYPE 2 DIABETES REGARDING PHYSICAL ACTIVITY IN WEST AFRICA

LOW HOUSEHOLD DIETARY DIVERSITY IS A MAJOR PUBLIC HEALTH CONCERN FOR WOMEN IN COASTAL BANGLADESH

MATERNAL LCPUFA SUPPLEMENTATION DURING PROTEIN DEFICIENCY IMPROVES BRAIN FATTY ACID ACCRETION IN RAT PUPS BY ALTERING MILK LCPUFA OF DAM

PHYSICAL ACTIVITY, SEDENTARY BEHAVIOUR AND FOOD HABITS, OF OVERWEIGHT STUDENTS BETWEEN 5 AND 10 YEARS OF A SCHOOL IN BOGOTÁ, COLOMBIA

ASSESSMENT OF ENERGY EXPENDITURE AND IRON STATUS OF PREGNANT WOMEN IN URBAN AND RURAL COMMUNITIES IN NIGERIA

DOES MATERNAL POSTPARTUM DEPRESSION HAVE LONG-TERM EFFECTS ON CHILD'S BEHAVIOUR?

EFFECTIVENESS STUDY OF THE CONSUMPTION OF MILK FORTIFIED WITH IRON ON THE NUTRITIONAL STATUS OF SCHOOL CHILDREN IN MOROCCO

CONTRIBUTION OF LOCAL FOOD BIODIVERSITY TO DIET AND NUTRITION OF WOMEN OF CHILDBEARING AGE IN BENIN

RELATION BETWEEN LEPTIN-ADIPONECTIN RATIO AND BODY FAT, INSULIN, GLUCOSE AND LIPID PROFILE DURING NORMAL PREGNANCY

IRON DEFICIENCY ANEMIA AND DIETARY PATTERNS OF 6-12 SCHOOL AGE CHILDREN IN KHARTOUM STATE: A HOSPITAL-BASED STUDY

POLYMORPHIC VARIANTS OF RBP4 GENE STUDY IN OVERWEIGHT CHILDREN

THE EFFECT OF MORINGA OLEIFERA LEAF EXTRACTS SUPPLEMENTATION TO THE PREGNANT WOMEN IN PREVENTING MATERNAL DNA DAMAGE

EFFICACY OF A MULTIPLE MICRONUTRIENT FORTIFIED MILK ON COGNITIVE PERFORMANCE OF SCHOOL-AGE CHILDREN

EARLY CHILDHOOD STIMULATION AND NEURODEVELOPMENT IN CHILDREN OF 12 AND 24 MONTHS OLD WITH ANEMIA

INCIDENCE OF NEURAL TUBE DEFECTS IN BRAZIL BEFORE AND AFTER FOLIC ACID FORTIFICATION

LONGITUDINAL GROWTH IN MEXICAN CHILDREN FEEDING WITH VEGETARIAN DIET

GROWTH IN PRE-SCHOOL CHILDREN FROM 3 EUROPEAN COUNTRIES AND ITS RELATIONSHIP WITH DIETARY DIFFERENCES

IMPACT OF MOTHERS' OBESITY AND GESTATIONAL DIABETES ON
THEIR OFFSPRING NEURODEVELOPMENT IN RELATION TO CHANGES IN PLACENTAL GENE EXPRESSION.......................................................... 1875
35
NEGATIVE EFFECTS ON CHILDREN’S DEVELOPMENT BY PRENATAL EXPOSURE TO ORGANOCHLORINE PESTICIDES.......................................................... 1875
36
LONG-TERM EFFECTS OF PRENATAL DHA AND 5-MTHF SUPPLEMENTATION ON THE OFFSPRING LC-MS METABOLICOS BIOMARKERS UP TO 9.5 YEARS OLD, IN RELATION TO FATTY ACID CHECK CELL COMPOSITION, DIET AND FADS POLYMORPHISMS ...................................................................................... 1876
37
COMPARISON OF THE ANALYTICAL PERFORMANCE OF DIFFERENT LC-MS METHODOLOGIES TO EVALUATE LONG-TERM EFFECTS OF DHA AND 5-MTHF SUPPLEMENTATION IN PREGNANT WOMEN ON THEIR OFFSPRING METABOLIC BIOMARKERS ............................................................... 1876
38
NEURODEVELOPMENTAL STATUS IN BABIES BORN TO OVERWEIGHT, OBESE OR DIABETIC PREGNANT WOMEN, DURING THE FIRST 18TH MONTHS OF LIFE........ 1877
